

# THE ADVENTURES OF BUCKETMAN

<http://www.public.navy.mil/comnavsafecen/>

# The Origin of Bucketman

- ▶ Bucketman first came to our attention incarnated as a Sailor
- ▶ In his first appearance, he sported a bucket on each foot, and he could walk around with them

# Higher and Higher

- ▶ Person who shot this photo said that this painter could work his way all around the room
- ▶ He didn't explain how the painter got up on the stack

# Bucketbaby

- ▶ Much later in the saga, we found this rare family photo
- ▶ Granted, this bucket isn't a substitute ladder, but just think of the easy clean-up (plus, diapers are optional during rides).

# South of the Border

Central America

Venezuela

# Bucketman's Brother

Same job site,  
two incarnations.

# Another Trifecta

And we still don't know how he gets up on top of that third bucket.

# New Heights

Bucketman acquires a helper, does a job at an airport, and still has to ignore the “Not-A-Step” provision.

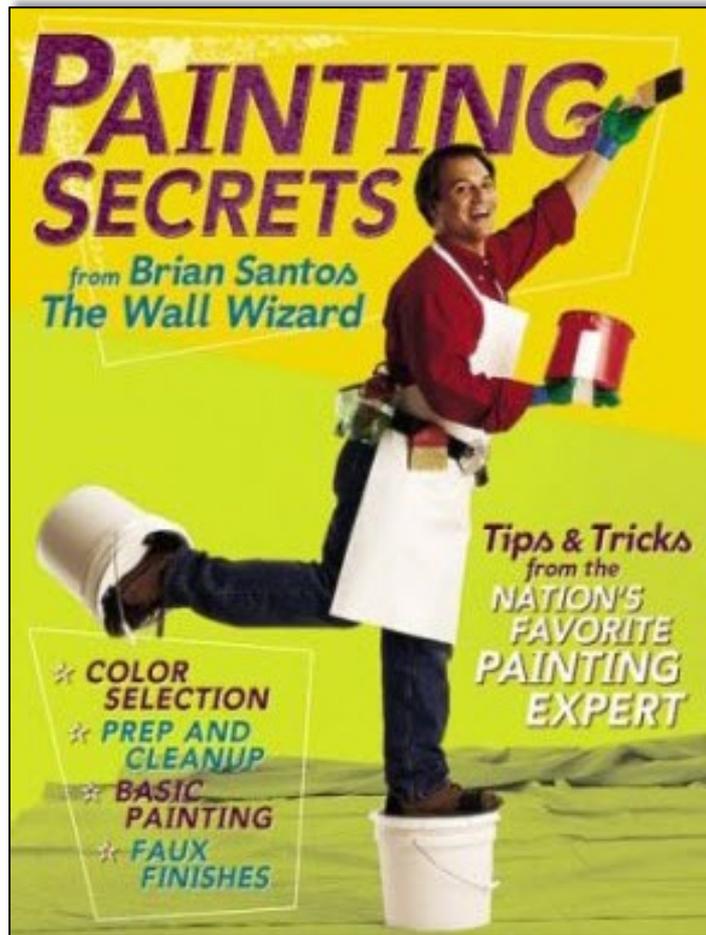

# Ever Higher

Completely comfortable with his eponymous ladder substitute(s) on floors, Bucketman adds a mobile scaffold to his repertoire.

# Bucketman Makes a Cover

If that is a “Tip,” thanks for nothing. If it is a secret, oops! We’ve been giving Bucketman too much publicity!

# Scaffolding 101

You don't have to stand on a bucket—you can stand on something supported by the bucket.

# Which End Is Up?

Bucketman demonstrates his ingenuity and versatility for the foreman.

# Turning to Crime?

An Australian 19-year-old broke into a locked bakery storeroom (via a skylight) and then couldn't get out. Security video showed him stacking and toppling off buckets several times. We knew he was an imposter.

# In the Garage

Bucketman continues to seek new and innovative uses for guess what (in this case, a giant plastic tub of mayonnaise).
